DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to method for producing pre-forms, classified in class 156 subclass 60 +.
 - II. Claims 15-28 drawn to pre-form product by process drawn classified in class 428 and Class 442 subclasses 291.1+ and 59 +.

2. The inventions are distinct, each from the other because:

Inventions of Group I and II are related as process of making and product made by the process. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product by process as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the pre-form fiber composite may be produced by a materially different process such as first forming a planar laminate of fiber and polymer and shaping before curing, rather than having a pre-determined shaped layer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1771

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. If applicant elects Group II, this application contains claims directed to the following patentably distinct species of the claimed invention: tissue, a multi-axial bonded fabric, interlaced tissue, a mat, and a unidirectional chain-reinforced semi-finished product, claim 16.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-14 and 15, 17-28 are directed to the generic substrate.

7. A telephone call was made to Richard Diefendorf on July 23rd to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda M Salvatore whose telephone number is 703-305-4070.

The examiner can normally be reached on M-F.
